

## **Lexington High School Solar Panels Installed May 2008**

**350 Lexington residents contributed to the New England Wind Fund during LexGWAC's Solar Panel Challenge initiative to win this array of solar panels for the high school from the Massachusetts Technology Collaborative. The twenty-two panels sit atop the Science Building at LHS and are visible from Worthen Road. Log in to <http://sunviewer.net/portals/LHS/> to see how much power is being produced.**
